UPON hearing the counsel the Court made the following O R D E R $\,$

We have heard Mr. Ranjit Kumar, learned Solicitor General at some length as well as the Chairman of the Central Pollution Control Board who is present in person. We have also had the advantage of hearing some other learned counsel appearing before us. Mr. Ranjit Kumar had on the previous date of hearing sought time to prepare a Plan of Action for appraising and improving the pollution levels in Delhi. He has today filed a compilation in which he has tried to explain the cause of pollution and the possible solutions for reducing the same During the course of hearing however when we asked Mr.Parihar, Chairman, CPCB whether

there are any Pollution Monitoring Stations, he stated that there are three such stations set up by the CPCB besides six others set up by the Delhi Pollution Control Board and nine by the Ministry of Earth & Sciences. He submits that in case some more such stations are set up in the city, it will certainly help the CPCB in keeping a close watch on the pollution levels and responding to the same appropriately. He seeks time to examine the need for setting up such additional stations as may be sufficient to meet the challenges in emergent situations and also the time frame within which such stations can be set up or upgraded. The control room set up by the CPCB for monitoring the pollution levels in the city also would need to be equipped with suitable machines for data received from other stations to be processed. He may also examine the need for upgrading the control room with the required equipment which may be useful for that purpose.

It is common ground that there is at present no definite plan of action formulated by the CPCB for responding to different levels of pollution at different points of time at different locations in the city. While the pollution levels are generally graded as satisfactory, severe or dangerous, there is no definite parameters for such gradation also. Mr.Ranjit Kumar submits that internationally accepted parameters are applied based on the air quality index are used for the purpose. He seeks time to bring on record the quality index internationally accepted and that

prescribed by the CPCB. What is more important is that the CPCB ought to devise its response to such levels. Suffice it to say that while causes for pollution may be varied, the CPCB does not for the present appear to have any definite plan on how to respond to such levels of pollution noticed by Board. The CPCB, therefore, needs to evolve a definitive plan of action that would make its different levels of pollution predictable. response to Unfortunately, however, no thought appears to have been given to this aspect so far, no matter this Court has been dealing with the issue for a long time. Be that as it may, it is never too late to make amends and draw up a suitable action plan, namely, creation of setting up of pollution monitoring centers appraising and grading of pollution levels and evolving different responses to different levels of pollution. Mr.Ranjit Kumar submits that given ten days time, the CPCB shall finalize the action on all three counts mentioned above in consultation with all Stake holders including the writ petitions shall be concerned. free to give their suggestions/inputs to the Chairman of the CPCB. The Chairman, CPCB may convene a meeting of all concerned on 19.11.2016 at 11.00 a.m.

These matters to stand adjourned to be listed again on 25.11.2016 at 2.00 p.m.
